BUILT FORD TOUGH

For decades, the Ford F-150® has defined what it means to be **“Built Ford Tough.”** As the best-selling pickup for generations, it carries an unmatched legacy of strength, durability, and innovation.

Now, that legacy has arrived in Europe, offering a new standard in capability, comfort, and convenience — ready to tackle any challenge and go anywhere you need to be.

Vehicles may be shown driving on designated off-road terrain, with specifications, features that may vary in availability by market. For complete legal and regulatory information, see disclaimer on the last page.

TOUGH LEADS THE WAY

Built Tough vehicles are constructed to achieve the highest level of performance and offer unmatched capability. Only a few vehicles that meet our legendary standards — passing through the most brutal tests in the harshest conditions on the planet — earn the privilege of being called Built Tough.

BEST-SELLING PICKUP

Launched in 1975, the F-150® is the flagship model of the F-Series, the best-selling pickup line in the United States for 49 years, and also the top-selling vehicle in America for 44 consecutive years.

Now in its 15th generation, the F-150® carries its entire legacy forward with a robust, imposing, and technologically advanced design and extreme capability — proving that Ford is the authority in pickups.

WORK HARD. PLAY HARDER.

01

PERFORMANCE & CAPABILITY

EFFORTLESS CAPABILITY

The F-150's performance story is one of unshakeable toughness and adaptability. Its advanced chassis, cutting-edge powertrains, and intelligent technologies unite to deliver best-in-class towing, surefooted off-road capability, refined on-road comfort, and exceptional efficiency. Every feature here is designed to let you explore further, work harder, and accomplish more.

THE STRENGTH AND POWER YOU NEED

Power
406 HP

Torque
555 NM

5.0L Coyote V8 Engine with 406 hp and 555 Nm of Torque

The iconic V8 engine paired with the 10-speed automatic transmission provides all the strength and power you need — 405 hp and 555 Nm of torque.

Extended Range

Go the extra mile — literally. A finely tuned powertrain, aerodynamic design, and a generous 136-liter fuel tank deliver an impressive range of up to 1,000 km, making long journeys more efficient and fewer stops a reality.

Drive Modes for Every Condition

Up to seven selectable drive modes instantly tailor the F-150's performance to your current environment — whether you're navigating a slippery winter road, tackling a muddy trail, or cruising on the highway — ensuring optimal traction, responsiveness, and efficiency.

Hill Descent Control™

This technology assists the driver in navigating steep descents with greater safety and comfort.

Advanced Aluminum-Alloy Body & Chassis

A lightweight, military-grade aluminum-alloy body sets the F-150 apart. By reducing weight and adding strength, this design improves fuel economy, braking, handling, and payload — all while maintaining the durability that makes it a legend.

LED Headlights with Dynamic Bending

Adjusting to the vehicle's movement, the dynamic bending headlamps significantly improve visibility in curves. Included on F-150 are also features like automatic high beam, daytime running lights, LED taillights, front and rear fog lights, providing a much clearer view.

20" Alloy Wheels with All-Terrain Tires

The 20" alloy wheels come equipped with all-terrain tires, ensuring grip and control on any type of surface.

NO PAVEMENT? PERFECT.

NO TRAIL? NO PROBLEM.

Off-Road Performance with 4×4 Traction

Tackle any terrain with confidence. Choose 4×4 High for dirt roads and rough surfaces, 4×4 Low for extreme off-road conditions, or let Automatic 4×4 (AWD) handle power distribution seamlessly on unpredictable terrain.

Electronic Locking Rear Differential

Engage extra traction at the push of a button. Designed for extreme conditions like deep mud or uneven terrain, this system ensures maximum power to the wheels that need it most — reinforcing the F-150's legendary Built Tough off-road DNA.

Intelligent 4×4 System and Off-Road Capability

An advanced two-speed 4WD system automatically adjusts torque for maximum grip. Combined with an electronic locking rear differential and specialized off-road drive modes, the F-150 is engineered to conquer even the toughest trails.

THE NO.1 OFF-ROAD TRUCK

Off-road driving shown on designated terrain. Full disclaimer on page 59.

RAPTOR

F-150 RAPTOR®

The F-150 Raptor® is about more than just speed — it's built to conquer brutal off-road environments. Its capability and durability stem from over a decade of Ford Performance expertise in engineering and torture-testing high-performance trucks. Ford has also upgraded the driveline to ensure the Raptor® handles any challenge with confidence and control.

RAPTOR

FOX™ shocks with Live Valve™ Technology

The next-generation FOX suspension enables **35.5 cm of front and 38.1 cm of rear** extra-long suspension travel, designed to adapt and provide optimal damping over rough terrain. Meanwhile, the **rear shocks feature a large external oil reservoir,** helping to maintain cooler operating temperatures under demanding conditions.

The **five-link rear setup** incorporates **extra-long trailing arms, a Panhard rod, and 610-mm coil springs—the longest in its class**—delivering exceptional off-road capability while minimizing any loss in towing and payload capacity.

- **+9 % (15 cm) of track width over F-150 for enhanced vehicle stability**
- **Unique heavy-duty cast-aluminum upper and lower control arms**
- **+18 % (5 cm) improved front suspension travel over previous-generation Raptor®**

CONQUER THE TERRAIN

Off-road driving shown on designated terrain. Full disclaimer on page 59.

RAPTOR

Terrain Management System

(TMS) features 7 driver-selectable preset modes to enhance driving dynamics in a variety of terrains — including Baja and Rock Crawl modes.

Trail Control

Trail Control™ with one-pedal drive manages throttle and braking at low speeds, letting you precisely creep over obstacles while focusing purely on steering and line choice.

Trail Turn Assist

Trail Turn Assist brakes the inside rear wheel at full steering lock, helping pivot the truck through tight trails and switchbacks – cutting the turning radius nearly in half in some situations

TOUGH. TRIED AND TRUE.

Off-road driving shown on designated terrain. Full disclaimer on page 59.

RAPTOR

Power Delivery

F-150 Raptor® gets power to the BFGoodrich® KO2 all-terrain tires via a **2 speed automatic AWD with mechanical locking 4WD and Hi-lock transfer case by TORSEN®.** In addition, the **TORSEN® Front Differential** helps enhance off-road capability by significantly increasing power transfer and grip to the front tires, to help with climbing obstacles or steep inclines.

High-Output Power

The high-output 3.5L EcoBoost® V6 engine has **456 horsepower** and **691 Nm of torque** and is paired with a 10 speed automatic transmission featuring steering wheel-mounted paddle shifters for SelectShift® capability.

Power	Torque
456 HP	**691 NM**

02

INTERIOR COMFORT AND TECHNOLOGY

ELEVATE YOUR DRIVING EXPERIENCE

Step inside the F-150 and discover a cockpit designed around you. From advanced digital displays to high-end audio, intuitive connectivity, and indulgent comfort, every detail has been crafted to elevate your driving experience — turning every trip into a first-class journey.

Heated & Ventilated seats

10-way adjustable memory in the driver's seat, adaptable pedals and a heated steering wheel for personalised comfort in any conditions.

Advanced Driver Assistance

Ford Co-pilot360® offers an advanced suite of driver-assist technologies that help keep you safe on the road.

Stay Connected

The F-150 offers a range of advanced technology features, such as SYNC® 4 and Pro Power Onboard™, to keep you connected and powered up while on the go.

Living Room Feel

Premium comfort meets smart convenience. The B&O® Sound System with 14 speakers delivers immersive audio, while thoughtful storage and intuitive tech make every drive feel like home.

NEXT-LEVEL COMFORT. PREMIUM MATERIALS. ERGONOMIC DESIGN. NEXT-GEN FEATURES.

B&O® Unleashed by Bang & Olufsen®

Experience next-level sound with the B&O® Unleashed audio system by Bang & Olufsen®.

14 strategically placed speakers – including a powerful rear subwoofer – deliver rich, crystal-clear audio from every angle. Step inside and turn your cabin into a private concert hall.

Dual Glove Box

Organise your essentials with the help of the additional upper glove compartment.

Head-Up Display

A system that projects essential information onto the windshield using sophisticated technology so that you don't have to take your eyes off the road.

Wireless Phone Charger

Stay connected, effortlessly and charge your phone without the need for cables.

SYNC® 4 with 12” Multifunction Screen

SYNC® 4, Ford’s newest multimedia system, comes standard in Europe for the F-150 on a 12” high-resolution screen. This new generation has a processor twice as powerful, is faster, more intuitive, and more customizable.

You can split the screen and control various functions simultaneously, such as navigation, music, and towing, achieving the perfect balance between technology and the convenience of physical buttons.

Wireless Android Auto™ and Apple CarPlay® Connectivity

Interact with your smartphone’s apps directly on the central 12” screen. Calls, messages, music, and maps — everything you need to enhance your driving experience.

Built to Last

Premium Comfort ActiveX® is a high-end synthetic seating material designed to fit an active lifestyle. It is easier to clean, resistant to staining, and more durable than leather while maintaining a premium look and feel over time. ActiveX® does not include any animal-based material and is only available on F-150 Lariat®.

12” Digital Instrument Panel

The F-150 is equipped with an impressive 12” digital instrument cluster and drivers display featuring specific animations for each driving mode, selectable information areas, and auxiliary displays for off-road and towing.

360° Camera

The camera set provides a 360° panoramic view. See obstacles not normally in your line of sight in a much more modern and intuitive way on the F-150’s 12” center screen.

03

INNOVATION AND CONVENIENCE

ONE TRUCK. ENDLESS POSSIBILITIES.

Beyond performance and comfort lies a world of clever solutions that simplify your day. From illuminating your surroundings to reimagining how you access your cargo, the F-150's innovative features let you work smarter and relax better, wherever you roam. The Ford F-150 brings many smart solutions that provide practicality and comfort to users. The bed now features a side opening that facilitates access, helping to load or unload at the rear.

Lockable Fold-Flat Rear Storage Box

Keep valuable tools, equipment, or personal items locked away and out of sight.

The fold-flat rear storage box transforms your cabin into a secure storage solution.

RIDE IN COMFORT. WORK IN STYLE.

Power-Adjustable seating with Memory

Enjoy 10-way power-adjustable front seats with memory. Thanks to electric adjustments, your onboard experience is more practical and comfortable. The F-150 has memory-enabled power adjustments for seats, pedals, steering wheel (height and depth), and mirrors.

Twin Panel Moonroof

Enjoy an open and spacious feel with the Twin Panel Moonroof. With the push of a button, the front panel can tilt or fully retract, providing customizable airflow for ultimate comfort.

Built-in sunshades help reduce glare and keep the cabin at a comfortable temperature, making every drive more enjoyable.

Interior Work Surface

Use your laptop or enjoy a meal inside the F-150! When parked, the gear shifter can be folded down so you can open a stable work surface.

Turn your F-150 into a mobile office

The innovative interior work surface unfolds from your armrest, creating a stable, flat desk perfect for laptops, tablets, or paperwork — anywhere you park.

BUILT FOR EVERY TASK, EVERY ADVENTURE

360° Zone Lighting

Flood your surroundings with customizable light at the touch of a button, turning dark campsites, worksites, or driveways into well-lit, productive spaces.

Pro Access Tailgate

The multi-access tailgate offers three opening variations: side, center, and full, making it easier to access or load items in the bed. A tailgate built for convenience.

37°

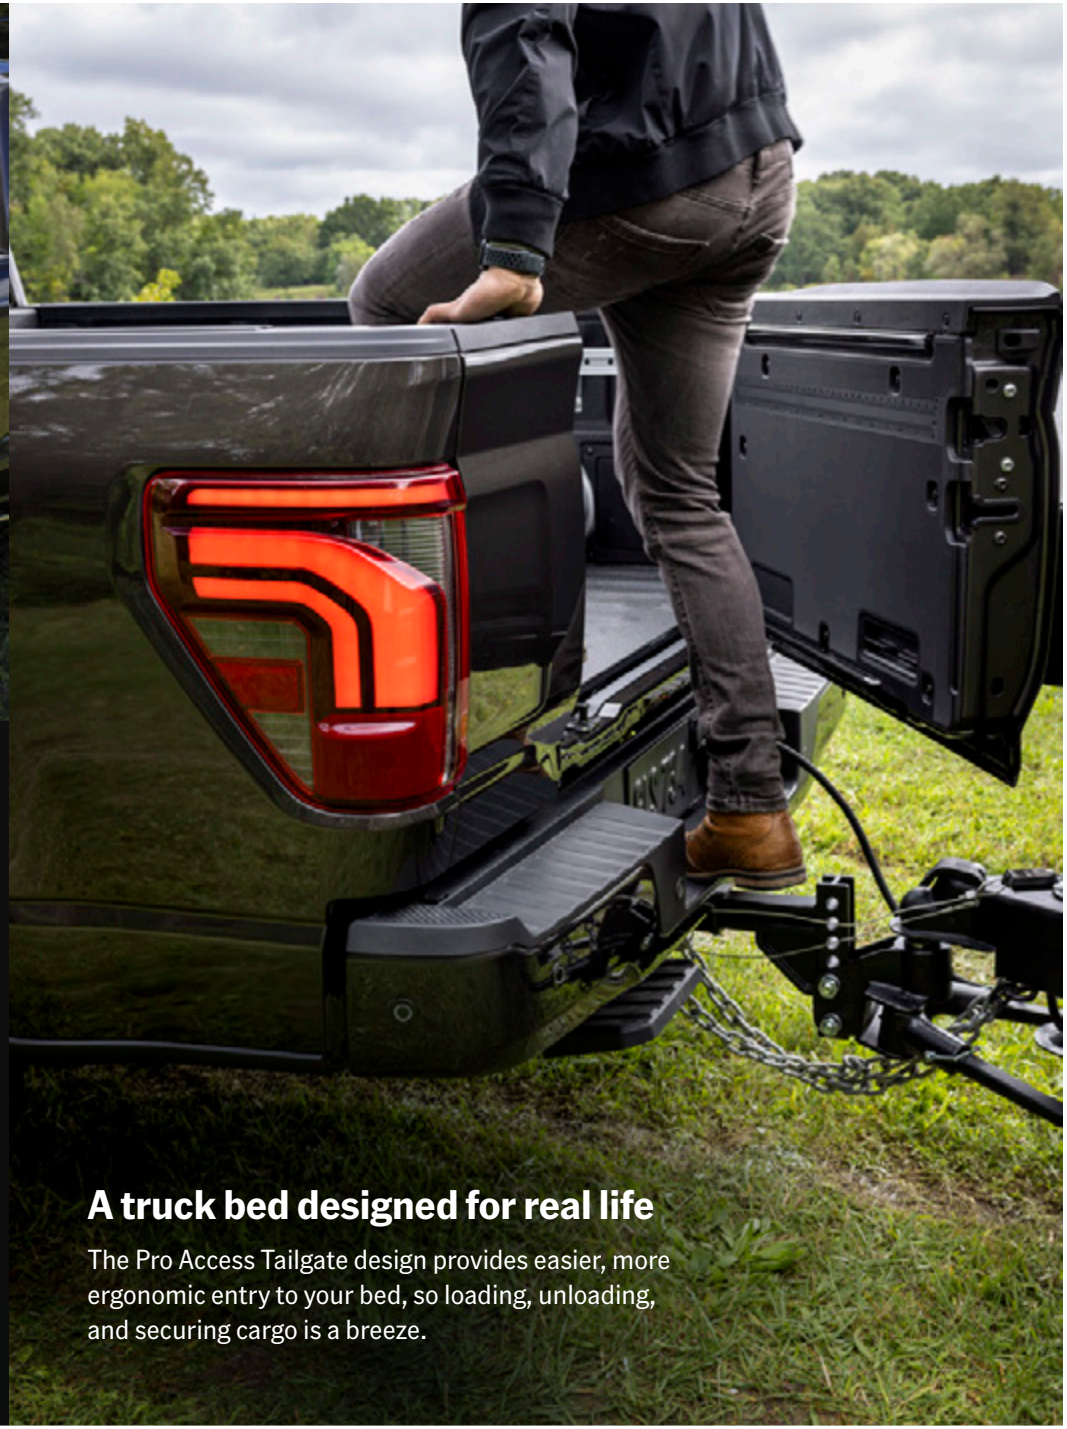

70°

100°

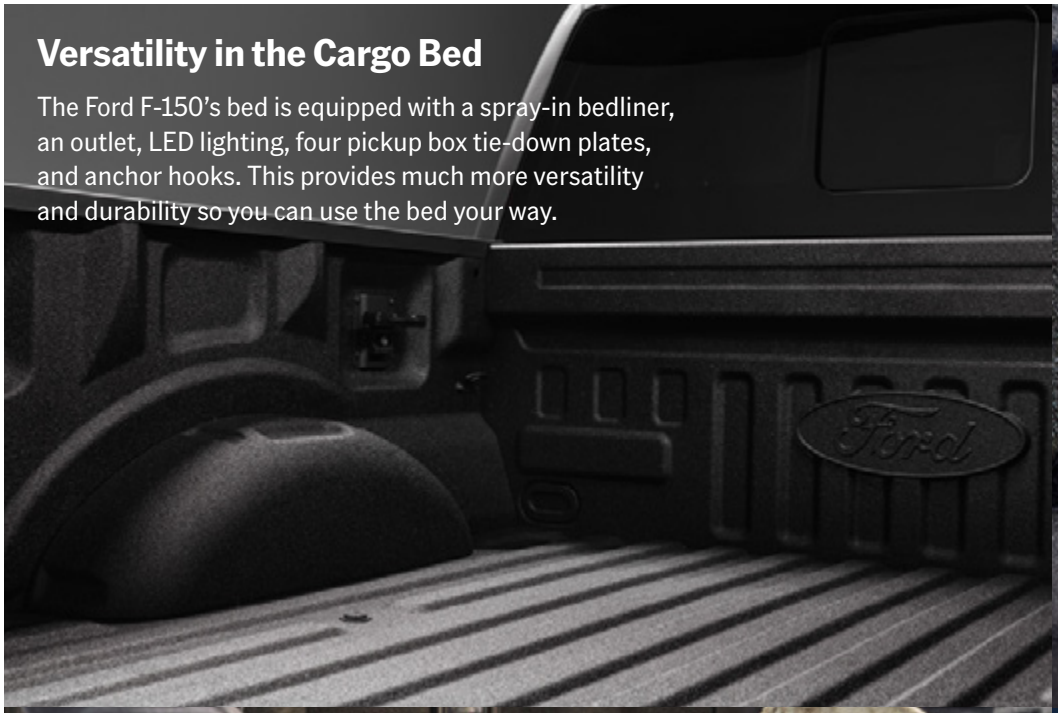

A truck bed designed for real life

The Pro Access Tailgate design provides easier, more ergonomic entry to your bed, so loading, unloading, and securing cargo is a breeze.

Versatility in the Cargo Bed

The Ford F-150's bed is equipped with a spray-in bedliner, an outlet, LED lighting, four pickup box tie-down plates, and anchor hooks. This provides much more versatility and durability so you can use the bed your way.

Integrated Box Lighting & Tie-Downs

Integrated box lighting and smart tie-downs help you stay organized, even after sunset. Secure your gear quickly and work confidently, no matter when the job calls.

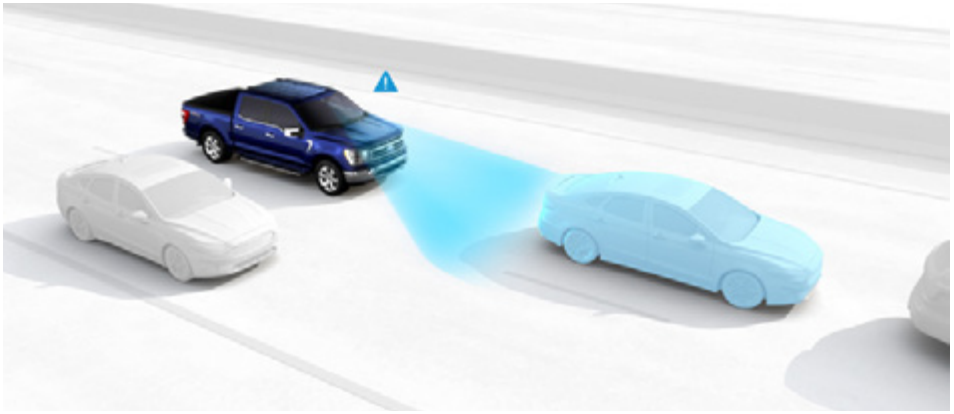

04

SAFETY AND DRIVER ASSIST TECHNOLOGY

TECH THAT KEEPS YOU IN CONTROL

With Ford Co-pilot360™, confidence is built into every F-150. Advanced sensors, cameras, and driver-assist features work together to help protect you, your passengers, and those around you. These technologies don't just react — they empower you to drive more safely and securely.

Pre-Collision Assist

Pre-Collision Assist with Automatic Emergency Braking can help detect a potential collision with pedestrians and vehicles ahead. It's designed to help reduce the impact of, and in some cases avoid, a frontal collision. If the system's sensors detect a potential collision with a vehicle or pedestrian ahead, a warning flashes, an alert sounds, and the brakes are applied if needed.

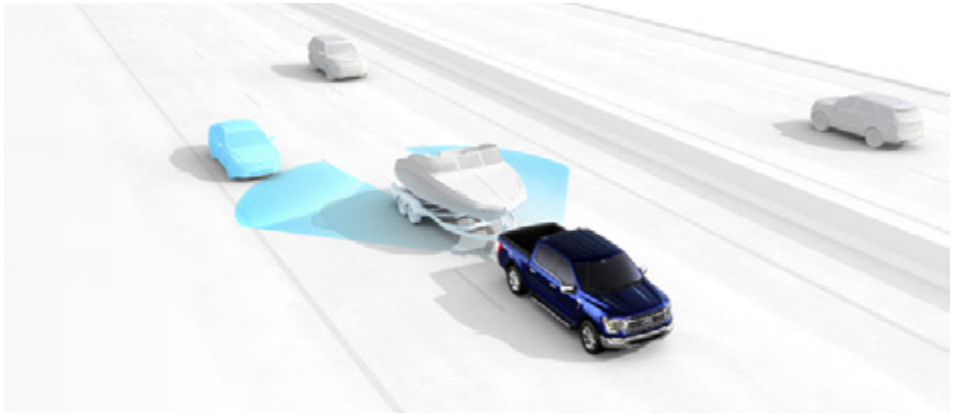

Adaptive Cruise Control With Lane Centering

Adaptive Cruise Control With Stop-and-Go and Lane Centering. Cruise according to your preferences and environment with this available feature. Your vehicle can use cameras and radar to maintain your set distance from the vehicle ahead, even stopping completely if necessary. The smart system will resume your set speed when traffic allows. It can also scan road lines and help keep your vehicle centered in its lane.

Reverse Brake Assist

Reverse Brake Assist helps sense and alert you to what's behind your vehicle when you're backing up. If it detects the risk of a collision with a pedestrian, vehicle, or shopping cart, it can automatically apply the brakes.

Blind Spot Assist

Blind Spot Assist lets you know if there's a vehicle beside you with a lighted symbol on the side view mirror. In addition to a visual cue, resistive steering torque can help let you know when you are leaving your lane.

SAFETY FOR EVERYONE

8 Airbags

The F-150 is equipped with 8 airbags (two front, two side, two curtain, and knee airbags for the driver and passenger), providing much more safety for everyone on board.

GEARED UP FOR LIFE

360-Degree Camera system

360-Degree Camera system with available front, rear, side and top-down camera, enjoy a clear view of your vehicle's surroundings. You can even view two angles at once with split view display.

Intersection Assist

Intersection Assist help detect potential collisions with oncoming traffic when turning left. Also helps detect a potential collision with pedestrians crossing the vehicle's path.

Exit Warning

Exit Warning uses rear corner radar sensors to help you get out of tricky parking situations, alerting you to unexpected vehicle or cyclists approaching the vehicle's sides from behind and will also alert you when opening the driver or passenger door.

TOW LIKE A PRO

Pro Trailer Hitch Assist™

Get hitched on your own. This available feature uses the rear sensors to align the trailer's hitch with the ball, controlling the steering, gas, and brakes on a reverse path to get the job done.

Trailer reverse guidance

This available feature is designed to help improve visibility while maneuvering trailers in reverse. It uses the 360-degree camera system to automatically select the angle that provides the best visibility based on the direction of the trailer.

Pro Trailer Backup Assist™

Take your hands off the wheel and steer your trailer using the control knob for added convenience and awareness. The available system takes the guesswork out of maneuvering a trailer in reverse.
